

Sairam Nulakani.

FrontEnd Developer.

✉ sairamnulakani4@gmail.com ☎ 9603833672 📍 Hyderabad, Telangana in

PROFILE

Highly motivated and skilled React Developer with a passion for crafting dynamic and user-friendly web applications. Aspiring to leverage my expertise in front-end development and proficiency in React.js to contribute to innovative projects that redefine the digital landscape. Seeking a challenging role in a collaborative team environment where I can continuously learn and grow while delivering exceptional user experiences through clean and efficient code. Committed to staying abreast of emerging technologies and best practices to create cutting-edge solutions that push the boundaries of web development.

SKILLS

- | | | |
|--------------|---------------------|-------------------|
| • HTML | • CSS | • JavaScript(ES6) |
| • Typescript | • React | • Bootstrap |
| • Tailwind | • Styled Components | • Material UI |
| • Nodejs | • MYSQL | • Git |
| • NextJs | | |

PROJECTS

E-Commerce Project

- Developed a responsive e-commerce website(FullStack) using React JS
- Implemented reusable components for product listing, shopping cart.
- Handling States and Props in entire application.
- Form validation done through useRefs ,Formik and Yup.
- Utilized React Router for smooth navigation between different pages.
- Integrated API calls to fetch and display products data.
- Used Tailwind CSS for Designing entire Application with responsive Tablet view and Mobile view.
- Used React redux-tool kit to create store for manipulating Cart items.
- Used MySQL Database for Storing and Axios for Fetching Data.
- Written custom hooks for Cart management and API interactions.
- Integrated Stripe for payments.

Dash Board Project

- Developed a dynamic and interactive Frontend dashboard application using React.js and Syncfusion components.
- Utilized React.js, npm, and Syncfusion UI components to create an efficient and responsive dashboard.
- Built and integrated various Syncfusion components including data,grids,charts,orders,employees,calender,kanban,editor,color picker, and navigation elements to provide users with a comprehensive overview of key metrics.
- No backend used in this application all the data we can see in ui it is coming from data.js file.
- Using context api for State mangement between all these pages.
- Using react router dom for navigation between all pages.
- Designed interactive charts using Syncfusion's charting library to display line charts,area charts,bar charts,financial charts and color mapping charts etc.
- Implemented a customizable data grid using Syncfusion GridComponent to present tabular data with features such as search,edit,delete,sorting, filtering, and pagination.
- Implemented fully responsive design using Tailwind CSS ensuring optimal experience across all various devices and screen sizes.

- Implemented both light and dark themes in this dashboard application, providing users with light and dark theme experience based on their preferences.
- Utilized Git for version control, managing code changes and during development.
- Deployed this app using with Netlify. [Click here](#) .

Food Order Project :

- Developed a responsive **Food Order App** by using **Nextjs**.
- Utilized Next.js to build the app frontend for its server-side rendering and efficient routing capabilities.
- Implemented a fully responsive design using Tailwind CSS ensuring optimal user experience across various devices and screen sizes.
- Designed and developed reusable components such as Navbar, Slider, Featured Products, Offer Page, Menu Page, Category Page, Cart Page, Orders Page, Login Page.
- Utilized data.js file to fetch items and handle order transactions, enhancing the app's dynamic functionality.
- Leveraged Next.js's built-in routing system and employed the Link component for seamless navigation without full page reloads.
- Focused on providing an intuitive and user-friendly experience, allowing customers to easily browse the menu, add items to the cart, and proceed to checkout.
